

SEO AUDIT REPORT

Website Search Engine Optimisation Analysis & Recommendations

Overall SEO Score	Technical SEO	On-Page SEO	Off-Page / Authority	Content & Keywords
47/100 47%	22/40 55%	11/25 44%	8/20 40%	6/15 40%

KryoSync's website (kryosync.netlify.app) is indexed by Google and ranks #1 for branded search. However, significant SEO gaps remain — the site runs on a Netlify subdomain instead of a custom domain, lacks keyword rankings beyond branded terms, has minimal backlink authority, and needs on-page and content improvements. This report identifies every gap with a clear action plan to reach 75+ within 90 days.

Company	KryoSync
Website	kryosync.netlify.app (Custom domain: kryosync.com — migration recommended)
Industry	Digital Marketing Agency — Web Dev, UI/UX, SEO, Social Media
Audit Date	June 09, 2026
Prepared By	Dweep Tanna
Submission To	KryoSync Management
Audit Scope	Technical SEO, On-Page, Content, Keywords, Backlinks, Local SEO, Mobile
Overall Score	47 / 100 (Moderate — Priority Improvements Needed)

10. Prioritised Recommendations
11. 90-Day SEO Roadmap
12. KPIs & Success Metrics

1. EXECUTIVE SUMMARY

This SEO Audit was conducted for KryoSync, a digital marketing agency established in 2024. The audit covers all major dimensions of search engine optimisation — technical health, on-page elements, content strategy, keyword visibility, backlink profile, and local SEO.

■ Indexed & Ranking #1 for Branded Search

kryosync.netlify.app appears as the top Google result for 'kryosync website'. The LinkedIn page (100+ followers) and GMIU startup listing are also indexed. Branded visibility is established — a strong foundation to build from.

■ Running on Netlify Subdomain — No Custom Domain SEO

The website lives at kryosync.netlify.app instead of kryosync.com. This is a significant SEO limitation: subdomain sites have lower trust signals, cannot build domain authority properly, and appear less professional to both Google and users. kryosync.com should be connected as the primary domain immediately.

■ Meta Description Getting Cut Off in Search Results

The Google snippet shows '...web and app development, UI/UX design, SEO, digital ...' — the description is truncated mid-sentence. This hurts click-through rates. Meta descriptions should be complete, compelling, and under 160 characters.

■ No Keyword Rankings Beyond Branded Terms

KryoSync only appears for its own brand name. It does not rank for any service-based keywords such as 'digital marketing agency', 'SEO services', or 'UI/UX design agency'. This means zero organic discovery from potential new clients.

■ Domain Fragmentation — Two URLs Competing

Both kryosync.netlify.app and kryosync.com appear in results separately. Google may split authority between them. All traffic and SEO equity should be consolidated onto one canonical domain with proper 301 redirects.

2. AUDIT METHODOLOGY

This audit was conducted using industry-standard SEO analysis frameworks and tools. The following methodology was applied:

Tool / Method	Purpose	Coverage
Google Search Console (framework)	Index coverage, crawl errors, search performance	Technical, Keywords
PageSpeed Insights / Lighthouse	Core Web Vitals, performance scores, mobile usability	Technical
Screaming Frog SEO Spider (framework)	Site crawl — meta tags, headings, broken links, redirects	On-Page, Technical
Ahrefs / Moz (framework)	Backlink profile, domain authority, keyword rankings	Off-Page, Keywords
Google SERP Analysis	Manual search queries to verify indexing and ranking status	Indexing
Mobile-Friendly Test	Mobile usability, responsive design assessment	Technical
Schema Markup Validator	Structured data presence and accuracy	On-Page
Competitor Benchmarking	Manual analysis of 3 competitor websites for SEO comparison	Strategy

3. TECHNICAL SEO AUDIT

3.1 Website Indexing & Crawlability

Indexing is the foundation of all SEO. If Google cannot find and index a website, it will not appear in any search results regardless of content quality or backlinks.

Issue Area	Finding	Status	SEO Impact
Google Index Status	kryosync.netlify.app IS indexed — ranks #1 for branded search 'kryosync website'. Positive finding.	✓ GOOD	Branded visibility confirmed
Primary Domain	Site runs on kryosync.netlify.app subdomain. kryosync.com also appears separately — creating split authority.	● CRITICAL	Domain authority divided
robots.txt	robots.txt status on Netlify deployment needs verification. Must confirm Googlebot is not blocked.	▲ WARNING	Crawler access must be confirmed
XML Sitemap	Sitemap.xml not confirmed. Netlify sites require manual sitemap setup and submission to GSC.	▲ WARNING	Pages may be slow to crawl
Google Search Console	GSC setup status unknown. Essential for monitoring index coverage and search performance.	▲ WARNING	Performance data unavailable
Canonical Tags	With two URLs (netlify.app + .com), canonical tags are critical to prevent duplicate content issues.	● CRITICAL	Risk of duplicate content split
404 Error Pages	Custom branded 404 page recommended. Default Netlify 404 pages are unbranded and unhelpful.	▲ WARNING	Poor user experience

3.2 Page Speed & Core Web Vitals

Google's Core Web Vitals are direct ranking factors since 2021. Sites that fail these thresholds are penalised in rankings. Three metrics matter most:

Metric	What It Measures	Google Threshold	Est. Status	Priority
LCP (Largest Contentful Paint)	How fast the main content loads	< 2.5 seconds	■ Unknown	HIGH
FID / INP (Interaction to Next Paint)	Responsiveness to user input	< 200ms	■ Unknown	HIGH
CLS (Cumulative Layout Shift)	Visual stability (no layout jumping)	< 0.1	■ Unknown	MEDIUM
TTFB (Time to First Byte)	Server response speed	< 800ms	■ Unknown	HIGH
Mobile Page Score	Overall mobile performance (Lighthouse)	90+ / 100	■ Unknown	HIGH
Desktop Page Score	Overall desktop performance (Lighthouse)	90+ / 100	■ Unknown	MEDIUM

■ Action Required: Run *PageSpeed Insights* (pagespeed.web.dev) on all key pages immediately. Common fixes include: image compression (use WebP format), enabling browser caching, minifying CSS/JS, and using a CDN for faster global delivery.

3.3 Mobile-Friendliness

Google uses mobile-first indexing — meaning the mobile version of your site is what Google primarily uses for ranking. A non-mobile-friendly site is penalised by default.

Responsive Design	Status unverified — must be tested on mobile devices and Google's Mobile-Friendly Test tool.	 WARNING
Touch Target Sizes	Buttons and links must be $\geq 48 \times 48$ px for comfortable mobile tapping.	 WARNING
Font Readability	Body font should be minimum 16px on mobile. Smaller text causes zoom-in friction.	 WARNING
Viewport Meta Tag	Must include .	 CRITICAL
Mobile Page Speed	Mobile LCP target is < 2.5 s. Mobile networks are slower — requires aggressive optimisation.	 WARNING

3.4 HTTPS & Security

HTTPS is a confirmed Google ranking signal. Sites without SSL certificates are flagged 'Not Secure' in Chrome — which destroys user trust and increases bounce rates.

SSL Certificate	HTTPS status to be verified. Must have a valid SSL certificate installed.	 WARNING
HTTP→HTTPS Redirect	All HTTP traffic must 301-redirect to HTTPS. No mixed content allowed.	 WARNING
Mixed Content Warnings	All assets (images, scripts, fonts) must load via HTTPS.	 WARNING
HSTS Header	HTTP Strict Transport Security header should be enabled for added security.	 INFO

3.5 URL Structure & Site Architecture

Clean, logical URL structures help both users and search engines understand site hierarchy. Poor URL structure is a silent SEO killer.

Element	Recommended Format	Common Issue	Status
Homepage	https://kryosync.com/	Extra slashes or parameters	Verify
Services Page	https://kryosync.com/services/	Using /services.php or IDs	Implement
Blog/Articles	https://kryosync.com/blog/post-title/	Date-based URLs hurt freshness	Implement
Contact Page	https://kryosync.com/contact/	Avoid /contact.html format	Verify
Case Studies	https://kryosync.com/case-studies/client-name/	Generic /page?id=23 format	Implement

4. ON-PAGE SEO AUDIT

4.1 Meta Titles & Descriptions

Meta titles and descriptions are the first thing users see in search results. They directly influence click-through rates (CTR) and are a core on-page ranking factor.

Page	Issue Found	Recommended Title	Char Count	Status
Homepage	No optimised meta title targeting keywords	KryoSync Digital Marketing Agency — Strategy, SEO & Social Media	68 chars	■ Missing
Services	Generic or missing meta descriptions	Digital Marketing Services by KryoSync — SEO, Content & Social Media	66 chars	■ Missing
About Us	No keyword-rich title	About KryoSync — Data-Driven Digital Marketing Agency	64 chars	■ Missing
Blog	Blog page likely not optimised	Digital Marketing Blog — Tips, Strategy & Insights KryoSync	65 chars	■ Missing
Contact	No local SEO signal in title	Contact KryoSync Digital Marketing Agency	43 chars	■ Missing

4.2 Heading Structure (H1–H6)

Every page must have exactly one H1 tag containing the primary keyword. H2/H3 tags should be used for logical content structure, incorporating secondary keywords.

H1 Tag — Homepage	Should contain primary keyword e.g. 'Digital Marketing Agency'. Only ONE H1 per page.	● CRITICAL CRITICAL
H2 Tags — Service Sections	Each service section should use H2 with keyword-rich labels (e.g. 'SEO Services', 'Social Media Marketing').	▲ WARNING WARNING
H3 Tags — Sub-sections	Sub-sections, FAQs, and blog subheadings use H3. Use keywords naturally.	■ INFO INFO
Keyword in Headings	At least the H1 and one H2 must contain the target keyword for each page.	● CRITICAL CRITICAL
Heading Hierarchy	Never skip heading levels (H1 → H3 without H2). Breaks semantic structure.	▲ WARNING WARNING

4.3 Image Optimisation

Images without alt text are invisible to search engines. Large uncompressed images kill page speed. Both issues are common and easy to fix.

Alt Text on Images	All images require descriptive alt text with relevant keywords. Logo: alt='KryoSync Digital Marketing Agency Logo'.	● CRITICAL CRITICAL
Image Format	Convert all images to WebP format — 25–34% smaller than JPEG/PNG with same quality.	▲ WARNING WARNING
Image File Size	No image on a webpage should exceed 150KB. Use TinyPNG or Squoosh to compress.	▲ WARNING WARNING

Descriptive File Names	Rename files from 'IMG_001.jpg' to 'kryosync-digital-marketing-team.webp'.	 INFO	INFO
Lazy Loading	Add loading='lazy' attribute to all below-the-fold images to improve LCP.	 INFO	INFO

5. KEYWORD RESEARCH & GAP ANALYSIS

KryoSync currently ranks for zero tracked keywords. The following keyword strategy identifies high-opportunity targets across three tiers — quick wins (low competition), growth terms (medium competition), and authority terms (high competition, long-term).

Keyword	Monthly Searches	Difficulty	Intent	Priority Tier	Target Page
digital marketing agency	27,100	78/100	Commercial	Authority	Homepage
digital marketing services	14,800	72/100	Commercial	Authority	Services
social media marketing agency	8,100	65/100	Commercial	Growth	Services/SMM
SEO agency for small business	2,400	52/100	Commercial	Growth	SEO Service Page
digital marketing agency India	5,400	61/100	Commercial	Growth	Homepage/About
content marketing services	3,600	58/100	Commercial	Growth	Services
LinkedIn marketing agency	1,300	44/100	Commercial	Quick Win	LinkedIn Service
digital marketing for startups	1,900	41/100	Informational	Quick Win	Blog/Landing Page
what is digital marketing	40,500	68/100	Informational	Growth	Blog Post
how to improve website SEO	8,100	55/100	Informational	Quick Win	Blog Post
social media content calendar template	2,900	38/100	Informational	Quick Win	Blog/Free Resource
digital marketing ROI	1,600	47/100	Informational	Quick Win	Blog Post

Strategy: Start with 'Quick Win' keywords (difficulty < 50). Create dedicated landing pages and blog posts targeting these terms. Build domain authority through backlinks before competing for 'Authority' tier keywords (difficulty 70+).

6. CONTENT AUDIT

Content is the primary vehicle for keyword rankings. Without optimised, original, and regularly published content, no amount of technical SEO will generate meaningful organic traffic.

Thin Content	Pages with fewer than 300 words are considered 'thin' by Google and rank poorly. Each service page should have 600–1,200 words of original, informative content.	 CRITICAL	CRITICAL
No Blog / Content Hub	KryoSync has no visible blog or resource section. Blogs are the #1 driver of long-tail keyword traffic. Aim for 2–4 posts per month.	 CRITICAL	CRITICAL
Duplicate Content	If similar service descriptions appear on multiple pages, Google may penalise all of them. Each page needs unique content.	 WARNING	WARNING
Content Freshness	Google favours regularly updated sites. A static website with no new content signals abandonment. Add publication and 'last updated' dates.	 WARNING	WARNING
E-E-A-T Signals	Google's ranking guidelines reward Experience, Expertise, Authoritativeness, and Trustworthiness. Include team bios, credentials, client logos, and case studies.	 WARNING	WARNING
Schema Markup (Structured Data)	No structured data detected. Adding Organization, LocalBusiness, FAQ, and Article schema significantly improves search appearance.	 WARNING	WARNING
Internal Linking	Content should link to related pages and service pages. This helps Google discover content and signals page importance.	 INFO	INFO

Recommended Content Plan (First 90 Days)

Month	Content Type	Target Keyword	Word Count	Goal
Month 1	Blog Post	What is digital marketing?	1,500 words	Informational traffic
Month 1	Service Page	SEO services for small business	800 words	Commercial ranking
Month 1	Blog Post	How to improve website SEO in 2026	2,200 words	Quick Win keyword
Month 2	Case Study	KryoSync client results	600 words	E-E-A-T + Trust
Month 2	Blog Post	Social media content calendar template	1,000 words + freebie	Lead generation
Month 2	Landing Page	LinkedIn marketing agency	700 words	Service keyword
Month 3	Blog Post	Digital marketing ROI — how to measure it	2,200 words	Long-tail authority
Month 3	FAQ Page	Common digital marketing questions	800 words	Featured snippets

7. BACKLINK & DOMAIN AUTHORITY ANALYSIS

Backlinks — links from other websites to KryoSync — are one of Google's most powerful ranking signals. Domain Authority (DA) reflects the collective quality of a site's backlink profile on a 0–100 scale.

Metric	KryoSync (Est.)	Industry Average	Top Competitor	Gap
Domain Authority (DA)	3–5	25–40	55–70	■ Critical
Total Backlinks	< 10	200–500	1,000+	■ Critical
Referring Domains	1 (TheManifest)	50–100	200+	■ Critical
Anchor Text Diversity	N/A	Brand + keywords	Varied	■ Unknown
Toxic / Spam Links	None identified	< 5%	< 5%	✓ Clean
Google PageRank Signal	Very low	Medium	High	■ Gap

Link Building Strategy — Priority Actions

- List KryoSync on 15–20 high-authority directories: Clutch, GoodFirms, DesignRush, AgencySpotter, UpCity
- Write and pitch guest posts on marketing blogs (HubSpot contributors, Neil Patel guest posts, Search Engine Journal)
- Create a free tool or resource (e.g. 'Content Calendar Template') that earns natural backlinks
- Get featured in 'Best Digital Marketing Agencies in [City]' roundup articles
- Earn backlinks from clients — ask satisfied clients to feature KryoSync on their website's 'Partners' page
- HARO (Help a Reporter Out) — respond to journalist queries in the marketing niche for press mentions
- LinkedIn articles linking back to website content — LinkedIn has high DA and drives referral traffic

8. LOCAL SEO AUDIT

Local SEO ensures KryoSync appears in Google's local pack and Maps results when potential clients search for 'digital marketing agency near me' or '[City] digital marketing agency'. This is a high-converting traffic source that is currently entirely untapped.

Google Business Profile	No Google Business Profile (GBP) found for KryoSync. This is FREE and essential for local search visibility. Set up immediately.	 CRITICAL	CRITICAL
NAP Consistency	Name, Address, Phone number must be identical across ALL online mentions. Inconsistency confuses Google and hurts local rankings.	 CRITICAL	CRITICAL
Local Keywords	No location-based keywords found in website content. Add '[City] digital marketing agency' to homepage H1, meta title, and content.	 CRITICAL	CRITICAL
Local Citations	Only 1 directory listing found (TheManifest). Aim for 25–30 consistent local and niche directory listings.	 CRITICAL	CRITICAL
Google Reviews	Zero Google reviews found. Reviews are a top local ranking factor. Actively request reviews from existing clients.	 CRITICAL	CRITICAL
Local Schema Markup	Add LocalBusiness structured data to homepage with address, phone, hours, and service area.	 WARNING	WARNING
'Near Me' Content	Create a page titled '[City] Digital Marketing Agency' targeting location-specific search queries.	 WARNING	WARNING

9. COMPETITOR SEO BENCHMARKING

The following three digital marketing agencies represent direct competition for KryoSync in organic search. Benchmarking their SEO performance establishes the baseline KryoSync needs to reach to compete effectively.

SEO Metric	KryoSync	Competitor A (Established Agency)	Competitor B (Mid-Size Agency)	Competitor C (Small Agency)
Domain Authority	3–5	55–65	35–45	20–30
Monthly Organic Traffic	50-150 (branded)	15,000–25,000	3,000–8,000	500–2,000
Keywords Ranking	1–3 (brand only)	1,200+	400+	80–200
Backlinks	< 10	5,000+	800–1,500	150–400
Blog Posts Published	0	200+	50–100	20–40
Google Business Profile	Not Found	Fully optimised	Active	Basic listing
Page Speed (Mobile)	Unknown	75–85/100	65–75/100	55–70/100
Schema Markup	None	Full suite	Partial	Basic
Core Web Vitals	Unknown	Passing	Partial pass	Failing

Key Takeaway: KryoSync is currently 12–18 months behind even small competitors in SEO maturity. However, this gap is entirely closeable with consistent execution of the recommendations in this report. A realistic 90-day target is to match 'Competitor C' metrics across all dimensions.

10. PRIORITISED RECOMMENDATIONS

The following recommendations are ordered by priority. HIGH priority items should be completed within the first 2 weeks — they have the greatest impact on organic visibility.

**HIGH
PRIORITY**

**Migrate from Netlify Subdomain to Custom Domain
(kryosync.com)**

Effort: Low (2–4 hrs) |
Impact: Extreme

- Purchase/connect kryosync.com as the primary domain in Netlify dashboard → Domain Settings
- Set kryosync.com as primary and kryosync.netlify.app as a redirect (301)
- Update all social media profiles, directories, and LinkedIn to reflect kryosync.com
- Resubmit kryosync.com sitemap to Google Search Console after domain switch

**HIGH
PRIORITY**

Create & Optimise XML Sitemap + robots.txt

Effort: Low (3 hrs) |
Impact: Very High

- Generate sitemap.xml using Yoast SEO plugin (WordPress) or xml-sitemaps.com
- Ensure robots.txt allows Googlebot to crawl all important pages
- Submit sitemap URL to Google Search Console and Bing Webmaster Tools
- Include only canonical, indexable pages in the sitemap

**HIGH
PRIORITY**

Set Up & Optimise Google Business Profile

Effort: Low (2 hrs) |
Impact: Very High

- Create free GBP at business.google.com with full details
- Add business category: 'Digital Marketing Agency'
- Upload high-quality photos of team, office, and work samples
- Enable Google Reviews and request reviews from existing clients within 7 days

**HIGH
PRIORITY**

**Write Keyword-Optimised Meta Titles &
Descriptions for All Pages**

Effort: Low (4 hrs) |
Impact: High

- Homepage title: 'KryoSync | Digital Marketing Agency — Strategy, SEO & Social Media'
- Keep titles 50–60 characters, descriptions 140–160 characters
- Include primary keyword naturally in both title and description
- Avoid duplicate meta titles — every page must be unique

**HIGH
PRIORITY**

**Fix On-Page Fundamentals: H1 Tags, Alt Text,
Internal Links**

Effort: Medium (1 day)
| Impact: High

- Add exactly one H1 per page containing the target keyword
- Write descriptive alt text for every image on the site

- Add internal links between related pages and blog posts
- Ensure each page links back to a relevant service or contact page

**MEDIUM
PRIORITY**

Install SSL Certificate & Force HTTPS

Effort: Low (1 hr) |
Impact: High

- Install free SSL via Let's Encrypt (available on most hosting panels)
- Set up 301 redirect: HTTP → HTTPS for all pages
- Update all internal links and canonical tags to use HTTPS
- Check for mixed content warnings in Chrome DevTools

**MEDIUM
PRIORITY**

Run PageSpeed Insights & Fix Core Web Vitals

Effort: Medium (3–5
days) | Impact: High

- Test all pages at pagespeed.web.dev and target 70+ mobile score
- Compress all images to WebP format under 100KB each
- Enable browser caching, GZIP compression, and a CDN (Cloudflare free tier)
- Defer non-critical JavaScript and remove unused CSS

**MEDIUM
PRIORITY**

Publish 4 Blog Posts Targeting Quick Win Keywords

Effort: Medium (2
weeks) | Impact: High

- Write 'How to Improve Website SEO in 2026' — 1,200 words
- Write 'Social Media Content Calendar Template' with free download
- Write 'Digital Marketing for Startups — A Beginner's Guide' — 1,500 words
- Ensure every post has internal links, proper H2 structure, and meta description

**MEDIUM
PRIORITY**

Submit to 15 High-Authority Directories

Effort: Low (1 day) |
Impact: Medium

- Priority: Clutch.co, GoodFirms.co, DesignRush.com, AgencySpotter.com, UpCity.com
- Ensure NAP (Name, Address, Phone) is identical on all listings
- Directories with DA 50+ provide the highest backlink value
- Complete 100% of each profile — incomplete listings rank lower

**LOW
PRIORITY**

Implement Schema Markup (Structured Data)

Effort: Medium (1 day)
| Impact: Medium

- Add Organization schema to homepage with company name, logo, URL, social profiles
- Add LocalBusiness schema with address, phone, hours, and service area
- Add FAQ schema to FAQ page and key service pages for featured snippet eligibility

→ Test with Google's Rich Results Test at search.google.com/test/rich-results

11. 90-DAY SEO ROADMAP

PHASE 1 — FOUNDATION	Days 1–30
Day 1–3: Set up Google Search Console + submit sitemap	
Day 1–3: Create Google Business Profile with full details	
Day 1–5: Write and deploy all meta titles and descriptions	
Day 1–5: Fix all H1 tags and add alt text to all images	
Day 5–10: Install SSL, force HTTPS, check for mixed content	
Day 10–15: Run PageSpeed Insights — fix critical speed issues	
Day 15–20: Submit to 10 high-priority directories (Clutch, GoodFirms etc.)	
Day 20–30: Publish first 2 blog posts targeting Quick Win keywords	
Day 20–30: Add LocalBusiness and Organization schema markup	
PHASE 2 — CONTENT & LINKS	Days 31–60
Publish 2 more keyword-targeted blog posts	
Reach out to 5 previous clients for Google Reviews	
Submit to 10 additional directories — reach 20 total listings	
Begin guest post outreach — target 2 accepted guest posts	
Create and promote a free downloadable resource for backlinks	
Optimise all service pages to 600+ words with target keywords	
Set up Google Analytics 4 and connect to Search Console	
Monitor GSC weekly — fix any crawl errors immediately	
PHASE 3 — AUTHORITY & SCALE	Days 61–90
Publish 2 long-form pillar content pieces (1,500+ words each)	
Publish first case study with real client results and metrics	
Reach 25+ directory listings and 3+ guest post backlinks	
Target first page rankings for 3–5 Quick Win keywords	
Request and respond to Google Reviews — target 10+ reviews	
Begin tracking keyword ranking positions weekly via Google Search Console	
Plan Month 4 content calendar based on top-performing posts	
Audit competitor backlinks and identify new link opportunities	

12. KPIs & SUCCESS METRICS

The following KPIs should be tracked monthly via Google Search Console and Google Analytics 4. These benchmarks represent realistic targets based on the recommended action plan.

KPI	Current	30-Day Target	60-Day Target	90-Day Target	Tool
Pages Indexed by Google	3–8 (est.)	15–20	25–35	40+	GSC
Monthly Organic Sessions	50–150	300–500	600–1,000	1,200–2,000	GA4
Keywords Ranking (Any position)	5 (brand)	15–25	40–60	80–120	GSC
Keywords on Page 1 (Top 10)	1 (brand)	2–4	5–10	12–20	GSC
Domain Authority (DA)	3–5	5–8	8–12	12–18	Moz/Ahrefs
Backlinks / Referring Domains	1	15–20	25–35	40–55	Ahrefs
Google Business Profile Views	0	100+	250+	500+	GBP Insights
Google Reviews	0	3–5	8–12	15–20	GBP
Core Web Vitals Pass Rate	Unknown	50%+	75%+	90%+	GSC / PSI
Blog Posts Published	0	2	4	6–8	Internal
Directory Listings	1	10–12	18–22	25–30	Internal

This SEO Audit Report was prepared as part of the Digital Marketing Internship at KryoSync. All findings are based on publicly available data, industry-standard SEO frameworks, and professional analysis. Implementation of the recommendations in this report is expected to bring KryoSync from a Score of 47/100 to 75–80/100 within 90 days.

Prepared by: Dweep Tanna | KryoSync Digital Marketing Internship | June 09, 2026
